

Translations in the Field of Environmental Protection

ECO REG | Society for Ecomanagement and Regional Development mbH

AT A GLANCE

Branch

Environmental protection | Sustainability

Challenges

Short-term project-related translations on schedule
Fulfilment of high technical and environmental quality standards in translations

Scope

Languages: Spanish, Portuguese, German
More than 100,000 words

The cooperation was always trusting and result-oriented. Schneiders-Sprach-Service has not only distinguished itself through its reliability and adherence to deadlines for translations, but has also met the high technical and legal requirements of the translation texts in terms of content. Schneiders-Sprach-Service has thus made a considerable contribution to the successful work of ECO REG GmbH in South America.

Andreas Zimmermann, CEO

BACKGROUND

ECO REG GmbH is an office for environmental consulting in the sectors of contaminated site investigation and remediation of soils and groundwater, waste management and environmental law. Since 1997, we have been active not only in the German market but also in South America, e.g. in Colombia, Chile, Brazil, Peru and Mexico. Since 2006, we have been working closely with Schneiders-Sprach-Service in this context, especially for the preparation of certified documents, the translation of contracts with clients from the region and in the preparation of acquisition events.

Over the past 16 years, we have had well over 100,000 words translated through Schneiders-Sprach-Service.
